

Partnership Pathways

Partners make it possible!

The Quincy School-Community **Partnership Pathways** works to bring our schools, businesses and community organizations together to enhance the educational lives and opportunities of Quincy Public School students. Business and community partners gain positive exposure in the community while students gain valuable insight into business and community practices. Everyone benefits from this exciting initiative.

Understanding that our partner's needs and resources vary, the Quincy School-Community Partnership offers many ways to become involved in **Partnership Pathways**. Components of **Partnership Pathways** include: **President's Path, Student Support, Site Support** and **Career Connections**. Whether making a financial contribution, offering job training to our students or volunteering in our classrooms, we have a way in which your organization can make a difference in the lives of Quincy Public School students.

Our students are the future leaders of our community! Our students are your future employees! Talk to us today about how the Quincy School-Community **Partnership Pathways** can benefit you, your employees and our students.
